

Captain Billek Foundation presents

DRIVE FORE

M E L A N O M A

CAPTAIN BILLEK

FOUNDATION

Mission

To raise awareness by promoting education and supporting research of Melanoma.

About Captain Joe Billek & the Captain Billek Foundation

Captain Joe Billek was married to his high school sweetheart with two wonderful sons and a successful career at Tampa Fire Rescue.

Joe developed a tiny mole on his back and was diagnosed with an ulcerated melanoma in May of 2009. He had a wide excision performed with clear margins and no lymph node involvement. A PET scan showed a clean bill of health.

Nine months later, a follow up PET scan showed the melanoma had spread to his right lung and left scapula.

Over the next two years, Joe was seen by the top specialists throughout the U.S. and participated in numerous clinical trials. During this time, the melanoma continued to spread to his brain and other very vital organs.

Joe believed that by participating in clinical trials, the information the doctor's could receive from his results would someday help others in their fight - even if the trial did not work for him. He dedicated his life to helping others. He followed in the foot steps of his father - a retiree of FDNY - and served 28 years with Tampa Fire Rescue, retiring with the rank of Captain/ Paramedic.

In the final 18 months of his career, he showed us all how to face adversity with dignity and courage. Captain Billek rose to the challenge of battling melanoma with the same tenacity, determination and drive. He was a true example of what firefighters are.

Joe set an example that we should all hope to live by. He was a husband, father, son, brother, uncle, mentor, and a friend to many. The life lessons that were learned by the many followers of Joe's journey were life changing.

Captain Billek passed away on March 6, 2012 at the age of 51, after a two year fight against melanoma.

H&PE

Know the Facts

1 in 50 Americans will develop melanoma in their lifetime.

Nearly 20 Americans die from melanoma every day.

Melanoma is the 5th most common cancer among men & 6th most common among women.

30% of melanoma is not related to the sun or other UV exposure.

Women under the age of 39 have a higher probability of developing melanoma than any other cancer except breast cancer.

Recurrence of melanoma after initial treatment occurs in 1 out of every 20 patients.

An estimated 7,230 Americans passed away from melanoma in 2019

4% of diagnosed skin cancer is melanoma.

More than 1 million Americans are living with melanoma.

Melanoma is the most serious form of skin cancer due to its ability to spread.
